The current Christmas Light Brigade																
Briggs	Ian	No-one, except Edgar, spends longer "up top". Quietly gets on with it all, in all weathers, and gets it right.														
Durden	Sid	He might live miles away now but that doesn't stop him! Hugely helpful on the ground, but sometimes "up top".														
Evans	Dick	Father of Roo, and a "man on the ground" and machine driver for very many years. Also, with Jackie, his wife, a great help building lanterns and set pieces.														
Evans	Richard	The inventive genius of the crew; builder many displays; machine driver and lights engineer extraordinaire.														
Grant	David	Now Chamber secretary, so very involved in the switch-on. Very reliable and usually "up top". An engineer by training - it helps!														
James	Bryan	The man with the van, which we cannot do without. Off at the moment with health problems (we NEED him back soon..), but we still have the van!														
Johnson	Brian	Occasional man on the ground, keeper of the test equipment, and above all the brains behind the fantastic grotto.														
Morris	Chris	Driver of machine No 2; great company, and a very precise and dependable driver with bags of patience.														
Orgee	Richard	With Bryan, the man who gets the stuff in the right place at the right time. Builder of the Sleigh (with Brian).														
Parkes	Ted	The scientist, who deos all the tricky calculations, and repairs set pieces. Invaluable.														
Whiteley	Edgar	Our senior member of the crew, one of the hardest working and ALWAYS there when you need him. Usually "up top".														
Wilkins	Roger	Sort of secretary to the gang, who does all the paperwork and gets everyone together; does a lot of wiring. Always "up top".														
Wilkins	David	Third generation Wilkins; lives in London so can't be with us as much as he would wish.														
Williams	Dafydd	A really useful "man on the ground" or helper in the air; we are so glad to have him back after work kept him away.														
And we must not forget others, especially Jimmy Waller, who provides us with storage space, free of charge; and Keith Handley, who did the same some time back.																
Roger Davies, always there to provide help with mains connections.						Jez Slater, building electronic controllers.										
AND of course those invaluable people who have worked so hard behind the scenes fund-raising to give us the wherewithal to stage the display.																
Past members, in whose steps we tread, some of whom are sadly no longer with us.																
Bedford	John	Always came with Tom and Eric, working fearlessly on our primitve cherry pickers. Again, passed away many years ago, but a real stalwart.														
Bemand	Tom	Provided and drove a Fordson Power Major, with loader which we used as a (hairy) cherry picker - our first. Passed away many years ago.														
Bowcott	Les	For many years a very regular member of the gang, delivering the stuff around with a 3 litre Capri and trailer.														
Cresswell	Mike	Everyone knows him, still there in the fringes, and a great friend to us all.														
Day	Les	There at the start. Ran Maynes in the Square, and the stuff was kept at his place in the early years.														
Durden	Ollie	An occasional and useful helper along wih Sid.														
Garrett	Peter	A great stalwart for very many years from the very beginning, until mobility became a problem.														
Gibbs	Eric	Driver and provider of a machine for very, very many years, and very much missed.														
Huffer	Liz	For many years keeper of immaculate stores, tester of lamps, working in the background.														
Jenkins	Peter	A great member of the crew, sadly now in Llandrindod. We miss him.														
Lester	Jonathan	Jonathan was with us for some time until his Councillor duties got in the way! Did quite a lot on Health and Safety, for which we were very grateful.														
Morris	Bill	Who can forget him? There at the beginning. He WAS the lights. Hugely strong, inventive, nothing got in his way. Plus supplier of ginger biscuits. Made us fearless.														
Morris	Graham	You have to mention him as he was once part of our crew and is now a Reverend Canon. If we had an honorary chaplain he would be it.														
Parry	Neville	Came and worked with the Evans family for very many years. His antics are probably best kept secret! Much missed.														
Watkins	Tony	Electrician behind the scenes until recetly; technical guru, who designed and build the first set pieces. One of the very first.														
Watkins	George	For many years the delivery man; worked hard putting the stuff out. We have never forgotten a traffic cop booking him for stopping to unload lamps!														
Wilkins	John	Leader of the gang for so many years, organising, buying, everything. Known to one and all as "Father", and he was the boss!
